

The Kidnapping of Inda Jackson By Exciting Debut Author Cher Foth Launches First Of Young Adult Archaeology Adventure Series

1888PressRelease - After several years of research, I am now ready to unleash upon the world my first novel targeted to the young adult set and to whomever would like to read a good story about love and adventure. Inspired by Stephenie Meyer and her hero, Edward Cullen, the prose is also devoid of four letter words and inappropriate sex scenes. I like to think of it as Scarlett O'Hara meets Lawrence of Arabia.

Savannah, GA - Southern World Publishing announces the release of The Kidnapping of Inda Jackson, on sale, March 31st, at all major retailers. The Kidnapping of Inda Jackson, a contemporary young adult novel, is a compelling story, "deeply imagined and wonderfully atmospheric." A sweeping tale, spiked with intrigue, of romance, adventure, and self discovery, it demonstrates the reality that we are not locked in our own narrow world, but part of a vast spider web of human connections.

The Kidnapping of Inda Jackson launches the first of an archaeology adventure series spanning the globe in search of important and sometimes remote sites where life is precarious and danger always near by.

Cher Foth, living and traveling throughout the world, brings the rhythm and color from these exotic places into the voice of her novels. Through her research, she peppers her stories with factual bits of anthropology, history, and geography, adding dashes of Dickens and Austin.

Author, Cher Foth, may be contacted at cherfoth (@) comcast dot net or visit her website and blog at <http://www.cherfoth.com>.
